

Thanks for grabbing the Paycheck Budget Planner! 🎉

You're minutes away from being set up. Here's everything you need.

Get started in 3 steps

1. Enter your pay rhythm and bills on **Setup**.
2. On the **Planner**, enter a check's date and amount, then assign it: bills, spending, savings.
3. Drive **Left to Assign** to a green zero — that's a fully planned paycheck.

Excel or Google Sheets?

Excel: just open the file (Excel 2016 or newer). **Google Sheets:** upload the file to Google Drive, open it, then File → Save as Google Sheets.

Why some cells won't let you type

Formula cells are protected so a stray click can't break the math — every cell meant for typing is unlocked. Want full control anyway? Review tab → Unprotect Sheet. There's no password.

Was this useful? A quick rating on the product page genuinely helps a small shop — and if something's not working for you, reply to your receipt first: I'll fix it or refund you within 30 days, no hard feelings.

Questions or ideas? Reply to your purchase receipt — it reaches a real inbox.
